SECTION 1 - POLICY STATEMENT

Health and Safety Policy Statement

Here at Gwynedd Council, we aim to put the people of Gwynedd at the heart of everything the Council does. This means making sure we know what's important to our inhabitants and working to achieve that.

Obviously being safe is important to all of us and therefore health and safety is at the heart of Ffordd Gwynedd and is one of those elements we can't compromise on. There is no doubt that it is a fundamental expectation of all Gwynedd's people that the Council will not put them in harm's way. In the same way, none of the Council's staff come into work expecting to be injured. Put simply, we need not worry about the standard of service offered to the public unless that service is safe to begin with.

None of us can achieve a safe Council working in isolation. All staff need to work collectively, and be open and report any danger or problems immediately, whilst at the same time being sensible about risks, recognising that we can't always eliminate risks, but rather manage them.

It is often said that health and safety is a matter of common sense, and although there is an element of truth to this, in a large and complex organisation such as the Council nothing can be taken for granted. We must have clear structures, responsibilities and arrangements that everyone understands in order to safeguard staff and the people of Gwynedd, and that is what is outlined in this policy.

The Council's objective in relation to the above are:

1. To undertake our work safely and comply with legal requirements
2. To ensure that health, safety and staff wellbeing is given equal prominence as other management responsibilities within the Council.

3. To ensure that staff on all levels within the Council are competent to carry out their work in a safe way, and that they understand the obligations and risks associated with their work and any decisions they make.
4. To provide safe equipment and systems.
5. To provide and maintain safe and healthy work places and public buildings
6. To ensure that partners and contractors are competent to manage the risks associated with their work
7. To maintain appropriate arrangements for eliminating hazards where possible and reducing and managing risks where elimination is not possible.
8. To regularly monitor and review the arrangements and system in place and introduce continuous improvements.
9. To consult and involve employees and their representatives on health and safety matters
10. Take all opportunity to promote staff health and wellbeing within the Council

Corporate
Departmental
Local

Corporate Level
